WOMEN, MEN AND GENDER: THEORIES AND EVIDENCE

- An introduction to the field of women, men and gender studies
- The evolution of theories about women, men and gender
- Research questions, key findings in the state of arts and important directions for new theory and research

Dr. Canetto studies cultural norms, beliefs and narratives of femininity and masculinity in four domains: persistence and success in science, technology, math and engineering (STEM); cultural scripts of suicidal behavior; aging and sexual orientation; cultural and gender issues in human rights.
